

Geza Kovacs**geza@cs.stanford.edu****gkovacs.com**

| | |
|-------------------------|--|
| EDUCATION | Stanford University PhD Computer Science GPA: 4.0/4.0 2013 – now Massachusetts Institute of Technology BS+MEng Computer Science GPA: 5.0/5.0 2008 – 2013 |
| INDUSTRY EXPERIENCE | Microsoft Research – Research Intern, Redmond – work published at CSCW 2017 Summer 2015 Microsoft Research – Research Intern, Beijing – work published at CHI EA 2015 Summer 2014 Google Research – Software Engineering Intern, Mountain View Summer 2013 Developed a machine learning system for detecting taps on the phone bezel, for use in Android input methods. Google – Software Engineering Intern, Mountain View Summer 2012 Developed an NLP system to detect vocabulary and generate glossaries from book text (used MapReduce). Google – Software Engineering Intern, Mountain View Summer 2011 Developed a machine learning system to predict the quality of user reviews, now deployed on Google Play. Microsoft – Software Development Engineer Intern, Redmond – worked on compilers Summer 2010 Google – Summer of Code – worked on FFmpeg (open-source video transcoding library) Summer 2009 |
| RESEARCH HIGHLIGHTS | Large-scale Data Science Experiments for Behavior Change – published at CHI 2019 and CSCW 2018 HabitLab (https://habitlab.stanford.edu) is an online experimentation platform with <i>12,000+ daily active users</i> that I built. I have used it to conduct a variety of data science experiments and machine learning work: <ul style="list-style-type: none"> • Predicted changes in users’ intervention preferences over time (using LSTM networks; Python/PyTorch) • Analyzed time redistribution effects caused by interventions (using mixed models; R/Python/SciPy) • Analyzed effects of rotating interventions on effectiveness and attrition (cox regression and LMM; R) • Personalized interventions to each user based on effectiveness (using reinforcement learning; Python) • Predicted time spent on webpages, based on browsing visit history data (using random forests; Python/H2O) Effects of In-Video Quizzes on MOOC Lecture Viewing – published at Learning at Scale 2016 <ul style="list-style-type: none"> • A large-scale data mining analysis of Coursera’s in-video interaction logs in Machine Learning courses, analyzing effects of in-video quizzes on users’ video viewing and seeking behavior (Python/Hadoop/Pandas) |
| OPEN-SOURCE PROJECTS | UNetbootin (LiveUSB Creator) – http://unetbootin.github.io/ https://en.wikipedia.org/wiki/UNetbootin <i>40 million downloads.</i> UNetbootin creates bootable USB flash drives for various (50+) Linux distributions. Ubuntu Installer for Windows (Wubi) https://en.wikipedia.org/wiki/Wubi_(software) <i>Now part of Ubuntu.</i> Built the first versions of Wubi, which allows Ubuntu to be installed from Windows. |
| TEACHING EXPERIENCE | Natural Language Processing (6.863 at MIT, Fall 2012 TA), Human-Computer Interaction Research (CS 376 at Stanford, Fall 2018 TA), Understanding Users (CS 377U at Stanford, Spring 2019 TA) |
| RELEVANT COURSEWORK | Deep Learning (CS 230), Natural Language Processing (6.864, 6.863), Artificial Intelligence (6.034), Data Mining (CS 224w), Statistical Models (6.804), Statistics (18.440), Linear Algebra (18.700), Security (6.857), Bioinformatics (6.047), HCI (6.803), Algorithms (6.006, 6.046), Linguistics (24.900), Compilers (CS 143) |
| SKILLS AND TECHNOLOGIES | Programming: Python, R, JavaScript, C/C++, Java, Scala, C#, Ruby, TypeScript, CoffeeScript, Haskell, Bash Machine Learning: PyTorch, scikit-learn, Keras, TensorFlow, Deep Learning (RNN/LSTM/CNN/GAN), RL Natural Language Processing: NLTK, skip-grams, word2vec, GloVe, Attention Networks, HMM, PCFG Data Mining: NumPy, SciPy, Pandas, NetworkX, Hadoop, MapReduce, H2O, SQL, NoSQL (MongoDB/Redis) Data Science: Mixed models, Survival analysis, Experiment design, A/B testing, Multi-armed bandits, mTurk Data Analysis: Jupyter, RStudio, Visualization (D3.js/ggplot2/Plotly/Bokeh), Clustering, Sentiment Analysis Full-Stack Engineering: Node.js, Flask, MongoDB, Redis, PostgreSQL, Flow, Webpack, Vagrant, AWS EC2 Web + Mobile: HTML/CSS/JS, Polymer, React, Android (Java, Cordova, NativeScript), Responsive Design |
| AWARDS AND HONORS | Stanford Human-Centered AI Grant (for my research project HabitLab), 2018 National Defense Science and Engineering Graduate Fellowship, 2013 National Science Foundation Graduate Research Fellowship, 2013 1 st place, Most Useful, ACM UIST (User Interface Software and Technology) Student Innovation Contest, 2012 1 st place, ACM CHI (Conference on Human Factors in Computing Systems) Student Research Competition, 2012 1 st place, MIT Autonomous Robotics Competition (Maslab), 2010 |
