

I am an **Interactive Machine Translation** researcher at Lilt with expertise in **Data Science**, **Machine Learning**, **Natural Language Processing**, and **Human-Computer Interaction**. I have a Ph.D in Computer Science from Stanford University, and have been awarded the NSF and NDSEG Fellowships, and a Stanford Human-Centered AI Grant. I have written software used by millions of users – I built HabitLab, a data-driven behavior change system with **12,000+ daily active users**; I also wrote and maintain UNetbootin, an open-source project with **40 million downloads**.

## Education

<b>Ph.D.</b> , Computer Science	Stanford University	GPA: 4.0/4.0	2019
<b>B.S.</b> and <b>M.Eng.</b> , Computer Science	Massachusetts Institute of Technology	GPA: 5.0/5.0	2013

## Work Experience

<b>Principal Research Scientist</b>	Lilt	San Francisco	Feb 2021 - present
<b>Senior Research Scientist</b>	Lilt	San Francisco	Aug 2019 - Feb 2021

I head a team of researchers to develop and evaluate Lilt's interactive machine translation system used in production. Improved interactive MT system speed by shifting computation client-side via TensorflowJS and heuristics. Built named entity transliteration system based on Transformer architecture using tensor2tensor and Tensorflow. Developed metrics and logging to determine how translators spend their time and predict translator performance. Ran A/B tests to evaluate website translation ROI, and developed system that recommends pages to translate.
