Geza Kovacs
geza@cs.stanford.edu　　　　**gkovacs.com**

EDUCATION					
Stanford University	PhD	Computer Science	GPA: 4.0/4.0	*2013 – now*
Massachusetts Institute of Technology	BS+MEng	Computer Science	GPA: 5.0/5.0	*2008 – 2013*

INDUSTRY EXPERIENCE

Microsoft Research – Research Intern, Redmond – work published at CSCW 2017　　*Summer 2015*
Microsoft Research – Research Intern, Beijing – work published at CHI EA 2015　　*Summer 2014*

Google Research – Software Engineering Intern, Mountain View　　*Summer 2013*
Developed a machine learning system for detecting taps on the phone bezel, for use in Android input methods.

Google – Software Engineering Intern, Mountain View　　*Summer 2012*
Developed an NLP system to detect vocabulary and generate glossaries from book text (used MapReduce).

Google – Software Engineering Intern, Mountain View　　*Summer 2011*
Developed a machine learning system to predict the quality of user reviews, now deployed on Google Play.

Microsoft – Software Development Engineer Intern, Redmond – worked on compilers　　*Summer 2010*
Google – Summer of Code – worked on FFmpeg (open-source video transcoding library)　　*Summer 2009*

RESEARCH HIGHLIGHTS

Large-scale Data Science Experiments for Behavior Change – published at CHI 2019 and CSCW 2018
HabitLab (https://habitlab.stanford.edu) is an online experimentation platform with *12,000+ daily active users*
that I built. I have used it to conduct a variety of data science experiments and machine learning work:
- Predicted changes in users' intervention preferences over time (using **LSTM Networks**; Python/PyTorch)
- Analyzed time redistribution effects caused by interventions (using **Mixed Models**; R/Python/SciPy)
- Analyzed effects of rotating interventions on effectiveness and attrition (**Cox Regression** and **LMM**; R)
- Personalized interventions to each user based on effectiveness (using **Reinforcement Learning**; Python)
- Predicted time spent on webpages, based on browsing visit history data (using **Random Forests**; Python/H2O)

Effects of In-Video Quizzes on MOOC Lecture Viewing – published at Learning at Scale 2016
- A **large-scale data mining** analysis of Coursera's in-video interaction logs in Machine Learning courses, analyzing effects of in-video quizzes on users' video viewing and seeking behavior (Python/Hadoop/Pandas)

OPEN-SOURCE PROJECTS

UNetbootin (LiveUSB Creator) – http://unetbootin.github.io/　　　　https://en.wikipedia.org/wiki/UNetbootin
40 million downloads. UNetbootin creates bootable USB flash drives for various (50+) Linux distributions.

Ubuntu Installer for Windows (Wubi)　　　　https://en.wikipedia.org/wiki/Wubi_(software)
Now part of Ubuntu. Built the first versions of Wubi, which allows Ubuntu to be installed from Windows.

RELEVANT COURSEWORK

Deep Learning (CS 230), **Natural Language Processing** (6.864, 6.863), Artificial Intelligence (6.034), Data Mining (CS 224w), Statistical Models (6.804), Statistics (18.440), Linear Algebra (18.700), Security (6.857), Bioinformatics (6.047), HCI (6.803), Algorithms (6.006, 6.046), Linguistics (24.900), Compilers (CS 143)

TEACHING EXPERIENCE

Natural Language Processing (6.863 at MIT, Fall 2012 TA), Human-Computer Interaction Research (CS 376 at Stanford, Fall 2018 TA), Understanding Users (CS 377U at Stanford, Spring 2019 TA)

AWARDS AND HONORS

Stanford Human-Centered AI Grant (for my research project HabitLab), 2018
National Defense Science and Engineering Graduate Fellowship, 2013
National Science Foundation Graduate Research Fellowship, 2013
1st place, Most Useful, ACM UIST (User Interface Software and Technology) Student Innovation Contest, 2012
1st place, ACM CHI (Conference on Human Factors in Computing Systems) Student Research Competition, 2012
1st place, MIT Autonomous Robotics Competition (Maslab), 2010

SKILLS AND TECHNOLOGIES

Programming: Python, R, JavaScript, C/C++, Java, Scala, C#, Ruby, TypeScript, CoffeeScript, Haskell, Bash
Machine Learning: PyTorch, scikit-learn, Keras, TensorFlow, Deep Learning (RNN/LSTM/CNN/GAN), RL
Natural Language Processing: NLTK, skip-grams, word2vec, GloVe, Attention Networks, HMM, PCFG
Data Mining: NumPy, SciPy, Pandas, NetworkX, Hadoop, MapReduce, H2O, SQL, NoSQL (MongoDB/Redis)
Data Science: Mixed models, Survival analysis, Experiment design, A/B testing, Multi-armed bandits, mTurk
Data Analysis: Jupyter, RStudio, Visualization (D3.js/ggplot2/Plotly/Bokeh), Clustering, Sentiment Analysis
Full-Stack Engineering: Node.js, Flask, MongoDB, Redis, PostgreSQL, Flow, Webpack, Vagrant, AWS EC2
Web + Mobile: HTML/CSS/JS, Polymer, React, Android (Java, Cordova, NativeScript), Responsive Design

JOURNAL AND CONFERENCE PAPERS
